Humanly.io, July 2019 - Sept 2019

Business Development Intern

· Performed the BDR role and utilized a CRM
· Learned about the Talent Acquisition Ecosystem and related technology
· Communicated a SaaS product that is utilizing AI to automate scheduling, reference checking, and pre-screening for recruiting teams

PROJECTS

Return Ready

Website developed at HackDavis 2020 designed to be a resource hub for people returning to the job search after an extended leave of absence.

Team Progress Tracker

Designed an app used by ~100 people to track individual progress and team statistics. The data enables me to analyze my coaching tactics and motivate athletes by highlighting their improvement throughout the season.
